qubeSERIE Update 3.3.3

Released on 10.11.2021

qubeSERIE

Software is ready for iOS 15
Apple recently released iOS 15 for all their devices. We checked the compatibility of our software with the new operating system and can know recommend you to update your devices to the newest version

Don't update immediately
With the release of any new operating systems by Apple we don't recommend updating your devices immediately. Always wait for our official approval so we can ensure that our software still runs perfectly. We always notify you if you are good to update your devices!

Optimierungen:
- Optimized Translations
- Bugfixes and improved performance

NEW RELEASE

NEW Media center integrated in all qubeSERIES monitors
-Receive media now directly on the monitor, e.g. 12-lead ecg.

IMPROVEMENT qubeCPR
-Now it will be easier to identify the qubeCPR sensors, with the option to assign colours and numbers via the qubeCONTROLLER.
